Emaz Momin

9657116466 — mominemaz@gmail.com

Summary — Experienced Full Stack Developer with 3+ years of experience designing, developing, and maintaining scalable web applications using React.js, Spring Boot, Java, MySQL, PostgreSQL, and Supabase. Proficient in building RESTful APIs, implementing secure authentication, integrating third-party services such as Razorpay and Delhivery, and developing responsive user interfaces. Experienced in developing E-commerce, Real Estate Investment, Turf Management, Business Communication, and metadata-driven enterprise platforms. Skilled in AI-assisted software development using Claude Code, MCP servers, and reusable skills to streamline development workflows, improve productivity, and accelerate problem-solving. Strong understanding of end-to-end application development, database architecture, and collaborative Agile development practices.

Experience

Full Stack Developer — Cloudsmaya Services Pvt. Ltd. **July 2023 – October 2026 — 3 Years 4 Months**

- Designed, developed, and maintained scalable full-stack applications using React.js, Spring Boot, Java, MySQL, PostgreSQL, and Supabase.
- Developed and enhanced multiple applications, including Mufama (E-commerce), InvestMaya (Real Estate Investment Platform), and TurfMaya (Turf Booking and Management System).
- Contributed to WivaChat, a business communication platform featuring messaging, member management, and file and folder organization.
- Worked on Autoportal, a metadata-driven enterprise platform inspired by ServiceNow, supporting configurable applications and business process management.
- Designed RESTful APIs, implemented secure authentication, managed database schemas, and optimized database queries for performance and scalability.
- Integrated third-party services, including Razorpay, Delhivery, OTP providers, and email notification systems, to streamline payments, logistics, and user verification.
- Leveraged AI-assisted development tools, including Claude Code, MCP servers, and reusable skills, to streamline coding workflows, automate development tasks, and improve productivity.
- Developed responsive user interfaces using React.js and collaborated with project managers to gather requirements, estimate tasks, and deliver sprint commitments.
- Participated in code reviews, debugging, deployment, and production support while following software development best practices.

Skills

- HTML
- CSS
- Javascript
- Bootstrap
- Tailwind CSS
- React.js
- Material Design Bootstrap
- Java
- Spring Boot
- MySQL
- Node.js
- Express.js
- MongoDB
- APIs Integrations
- Claude Code
- MCP Servers
- Supabase

Projects

WivaChat – Business Communication Platform **2026**

- Developed a WhatsApp-like communication platform designed for businesses to manage conversations, team members, and internal collaboration.
- Implemented real-time messaging and communication features to facilitate seamless interactions between business members.
- Built file and folder management functionality to organize, share, and access business documents and resources.
- Developed features for member management, group communication, and centralized business conversations.
- Designed a user-friendly interface with messaging and collaboration features to streamline business communication and information sharing.

Turf Management System **2026**

- Developed a complete turf booking platform enabling users to search, book, and pay for sports turf reservations online.
- Built a dynamic slot configuration system with customizable pricing, availability, and effective date management for turf owners.

- Implemented secure authentication, booking management, and payment integration using React.js, Node.js, Supabase, and PostgreSQL.
- Designed an admin dashboard for managing turfs, bookings, customers, subscription plans, and analytics.
- Optimized the application with Row Level Security (RLS), image storage, and scalable database architecture.

InvestMaya.com – Real Estate Investment Platform **2025**

- Developed a platform allowing users to invest in fractional real estate properties with a seamless investment workflow.
- Built secure user authentication, KYC-ready workflows, investment tracking, and portfolio management features.
- Integrated payment gateway services and developed REST APIs using Spring Boot with MySQL for reliable transaction processing.
- Created responsive user interfaces using React.js for property listings, investment dashboards, and transaction history.
- Focused on secure data management, scalable architecture, and an intuitive user experience for investors.

E-commerce Application **2024**

- Developed a comprehensive e-commerce platform featuring product browsing, user authentication, and a seamless checkout process.
- Integrated delivery and payment APIs for efficient order processing and tracking.
- Utilized Spring Boot for backend services, managing database operations through MySQL.
- Focused on creating a responsive, user-friendly interface using React.js and MDB for enhanced design.
- Ensured secure transactions and efficient customer experience.

Autoportal – Metadata-Driven Enterprise Platform **2023**

- Developed a metadata-driven enterprise application inspired by ServiceNow, enabling configurable business applications and streamlined business processes.
- Worked on dynamic form generation, configurable data models, and reusable components to support flexible application customization.
- Implemented platform capabilities for workflow management, task tracking, and business process automation.
- Contributed to configurable modules, role-based access control, and centralized data management for enterprise operations.
- Designed reusable and scalable platform components to support diverse business requirements with minimal custom development.

Personal Portfolio (https://emaazmomin.github.io/portfolio/)

- Developed a responsive and interactive portfolio to showcase personal skills and projects.
- Implemented features for users to download resumes and send messages directly through the contact form.
- Integrated Nodemailer to send emails from the website interface, ensuring seamless communication.
- Gained hands-on experience with the full MERN stack, including front-end development with React and back-end management with Node.js and MongoDB.

Educations

Bachelor's of Computer Science Engineering (6.56 CGPA) **2019-2023**

Science I.T (58.46%) **2017-2019**
